# Specialist Concrete and Resin Flooring

Creation is a specialist concrete and resin flooring company that specialises in commercial, industrial and retail flooring projects.

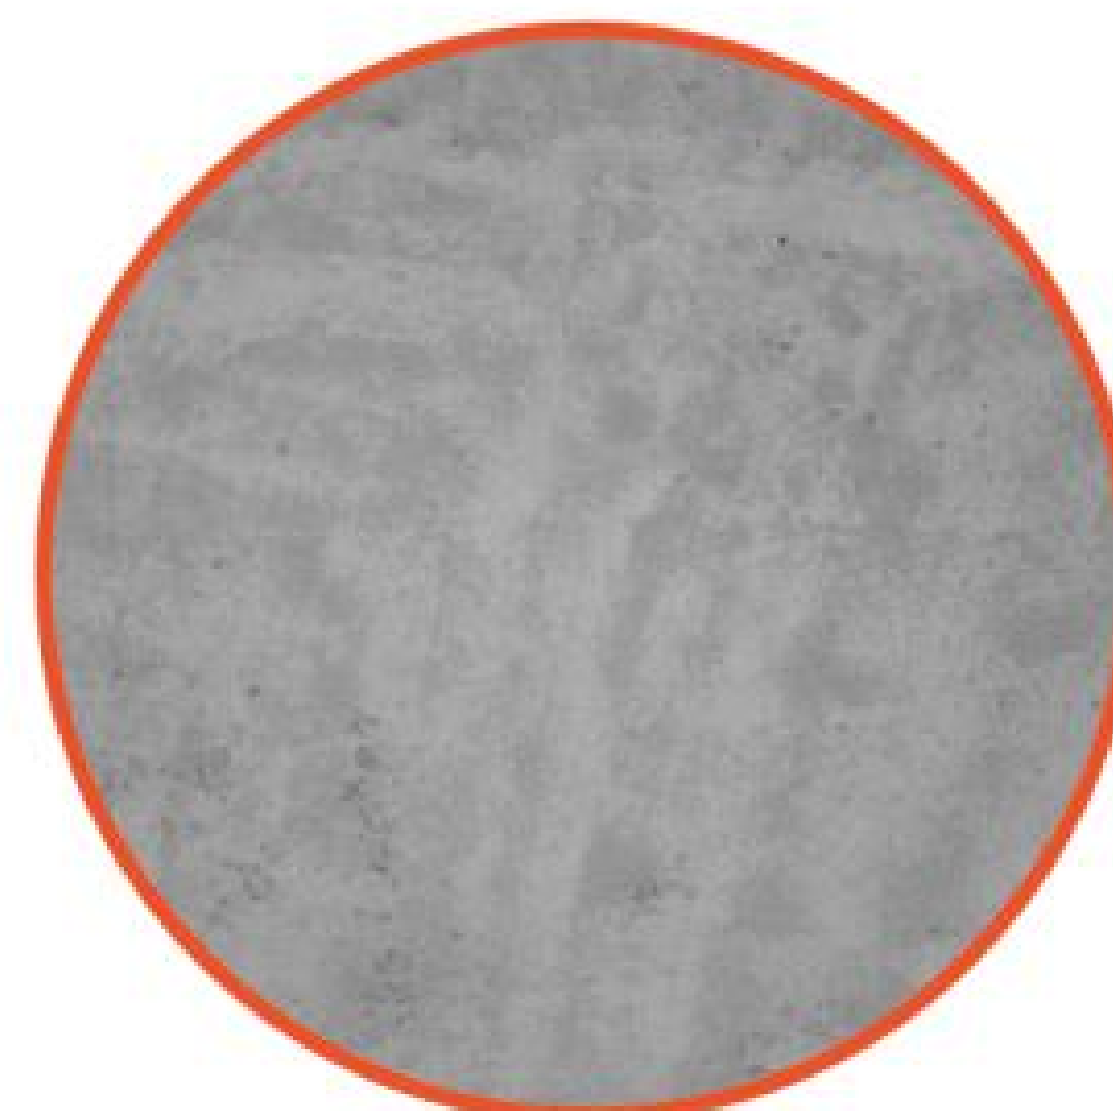

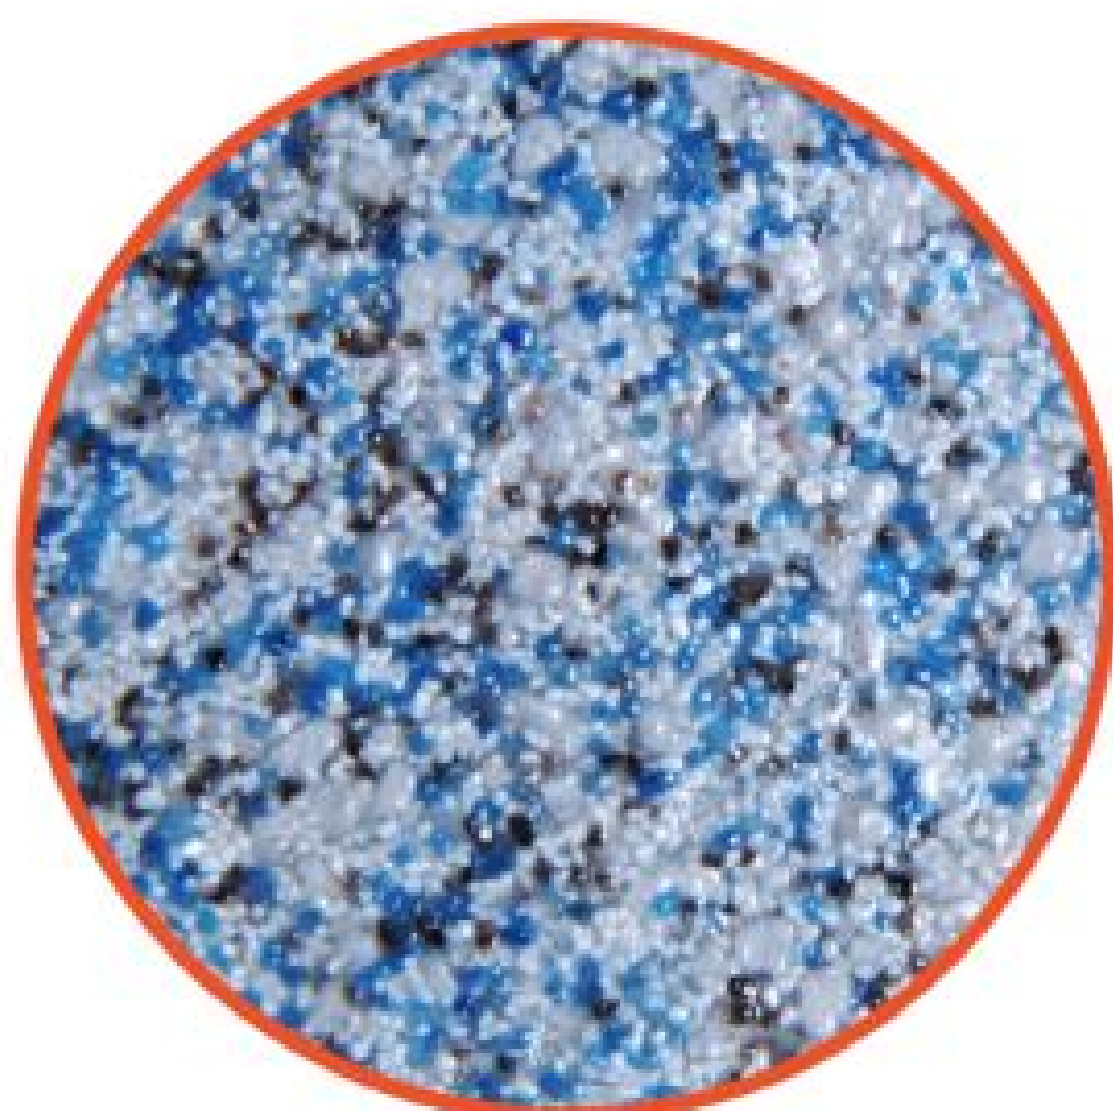

We have experience and knowledge using all industry leading products as well as a comprehensive portfolio of floor preparation equipment. From shotblasters to state of the art diamond grinding machines our diverse range of quality floor preparation equipment means that our flooring solutions are second to none.

Our resin flooring expertise spans the entire British Standard Floor Types (BS 8204-6) from 90 micron coatings right through to 15mm trowel applied heavy duty flooring systems.

Our concrete flooring knowledge allows us to offer the treatment of existing concrete floors or the installation of entirely new concrete or micro concrete floors and subfloors.

Concrete floors come with a variety of colouring options and may also include bespoke aggregate blends. We also offer micro concrete options from just 2mm that are suitable for industrial, commercial and retail spaces.

**Whatever your concrete or resin flooring requirements are we have the knowledge, skill and experience to deliver.**

# ComfortFlor™

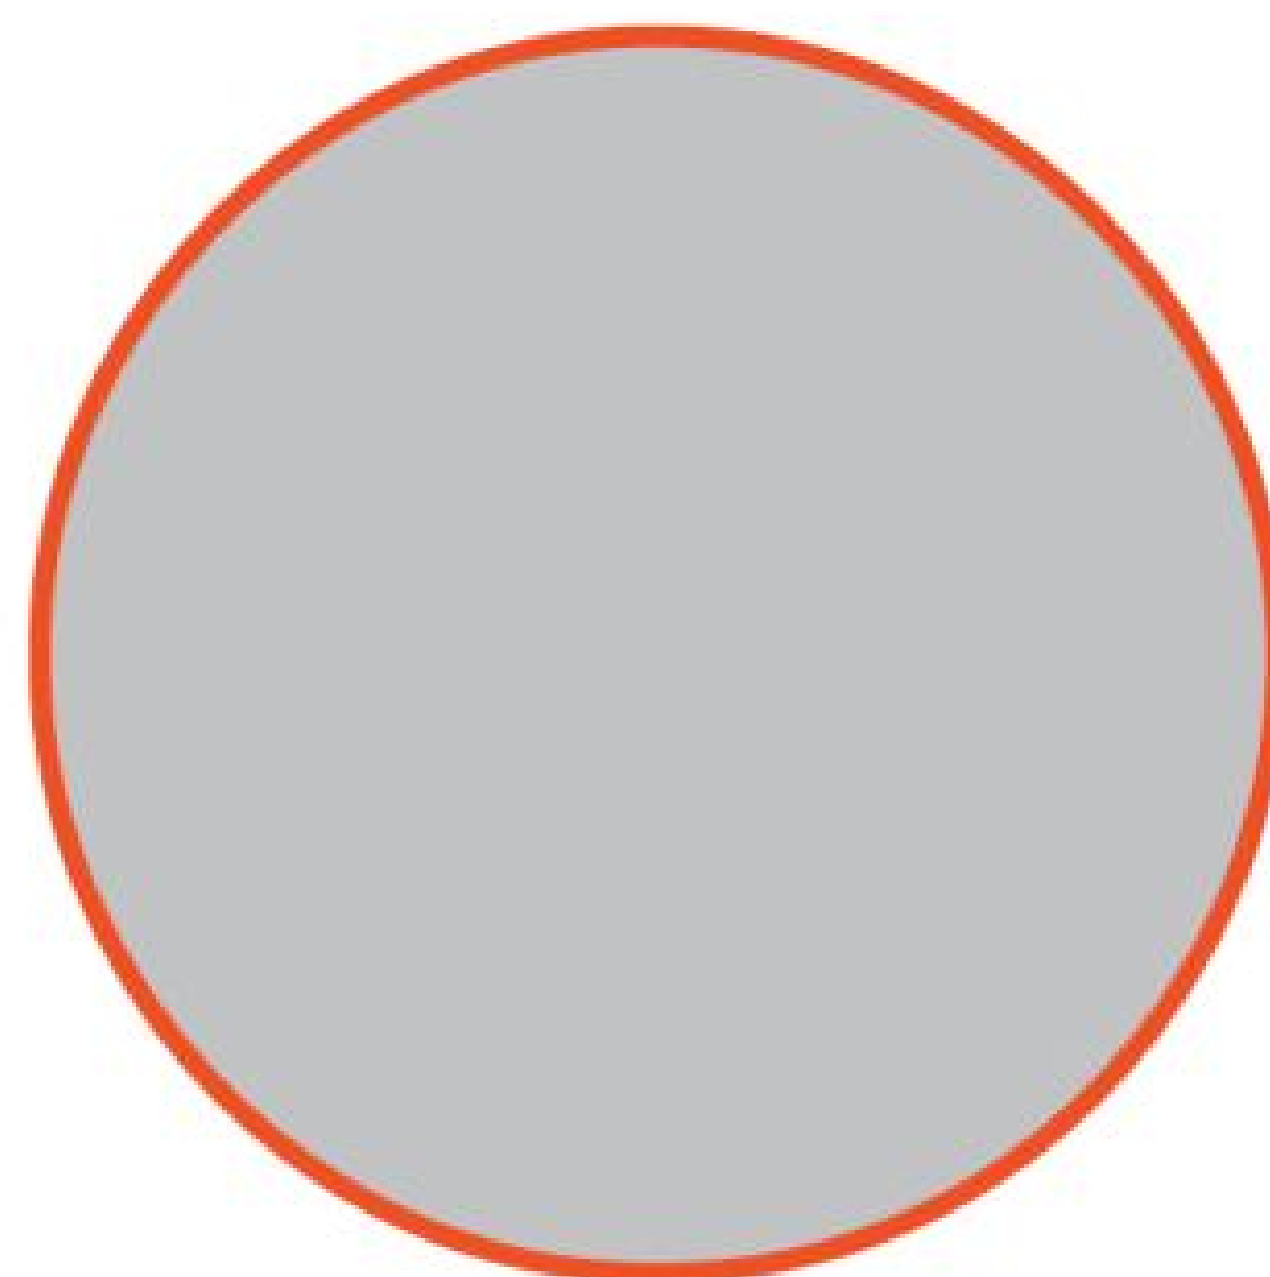

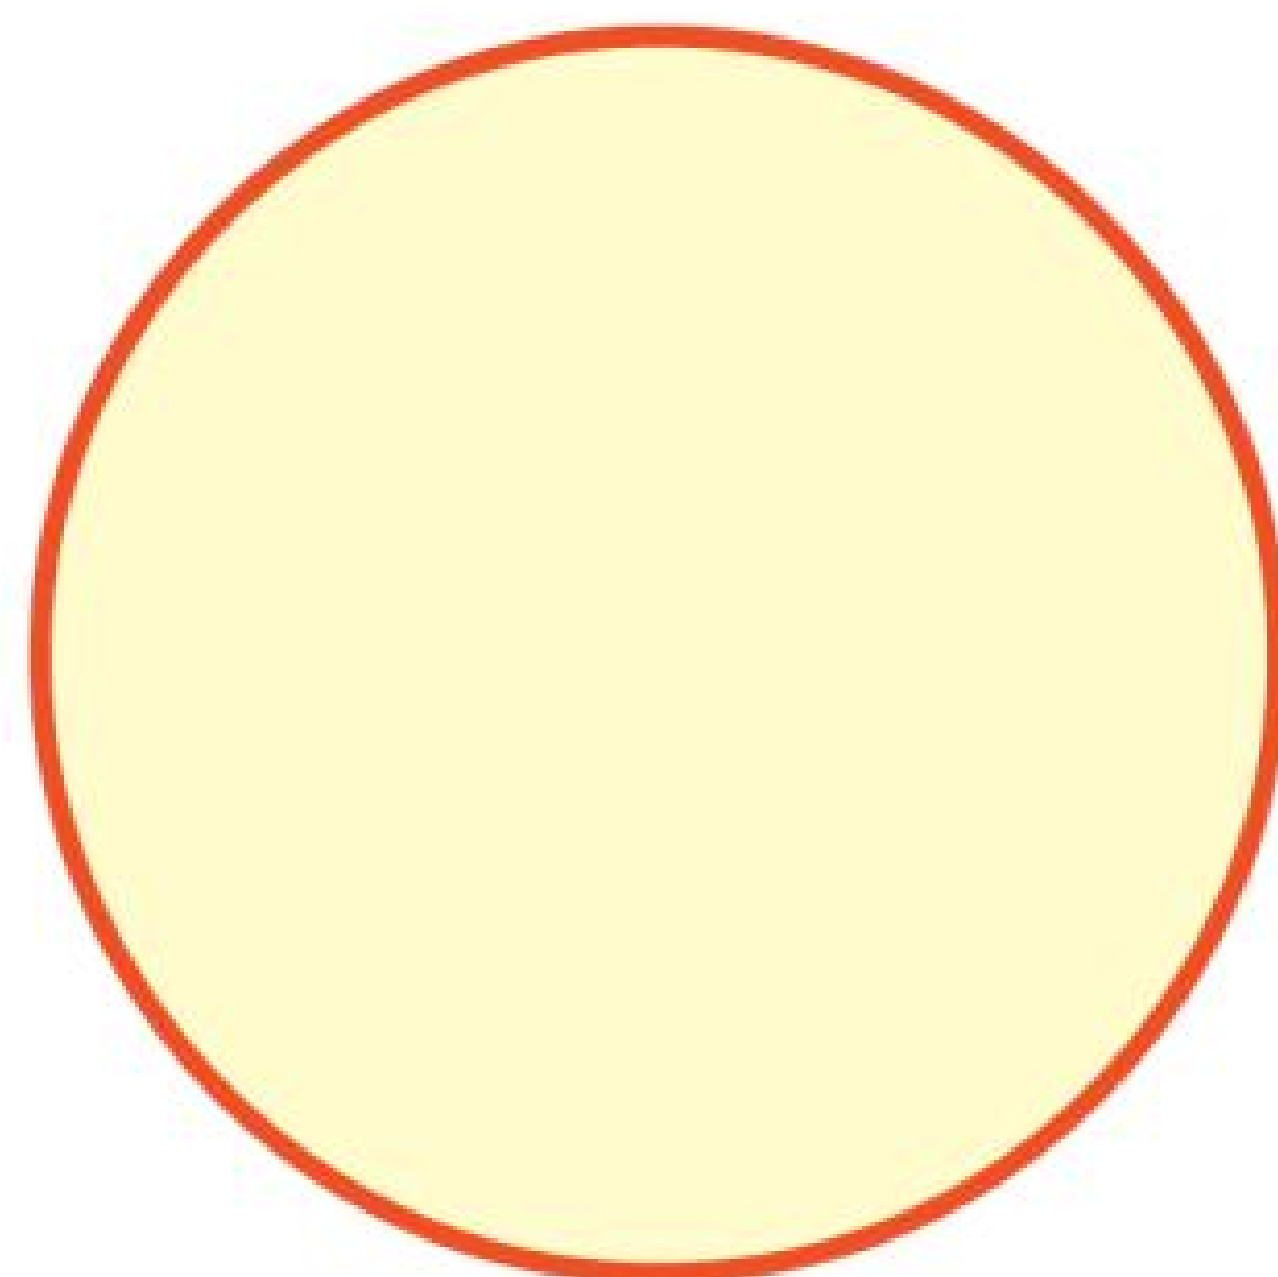

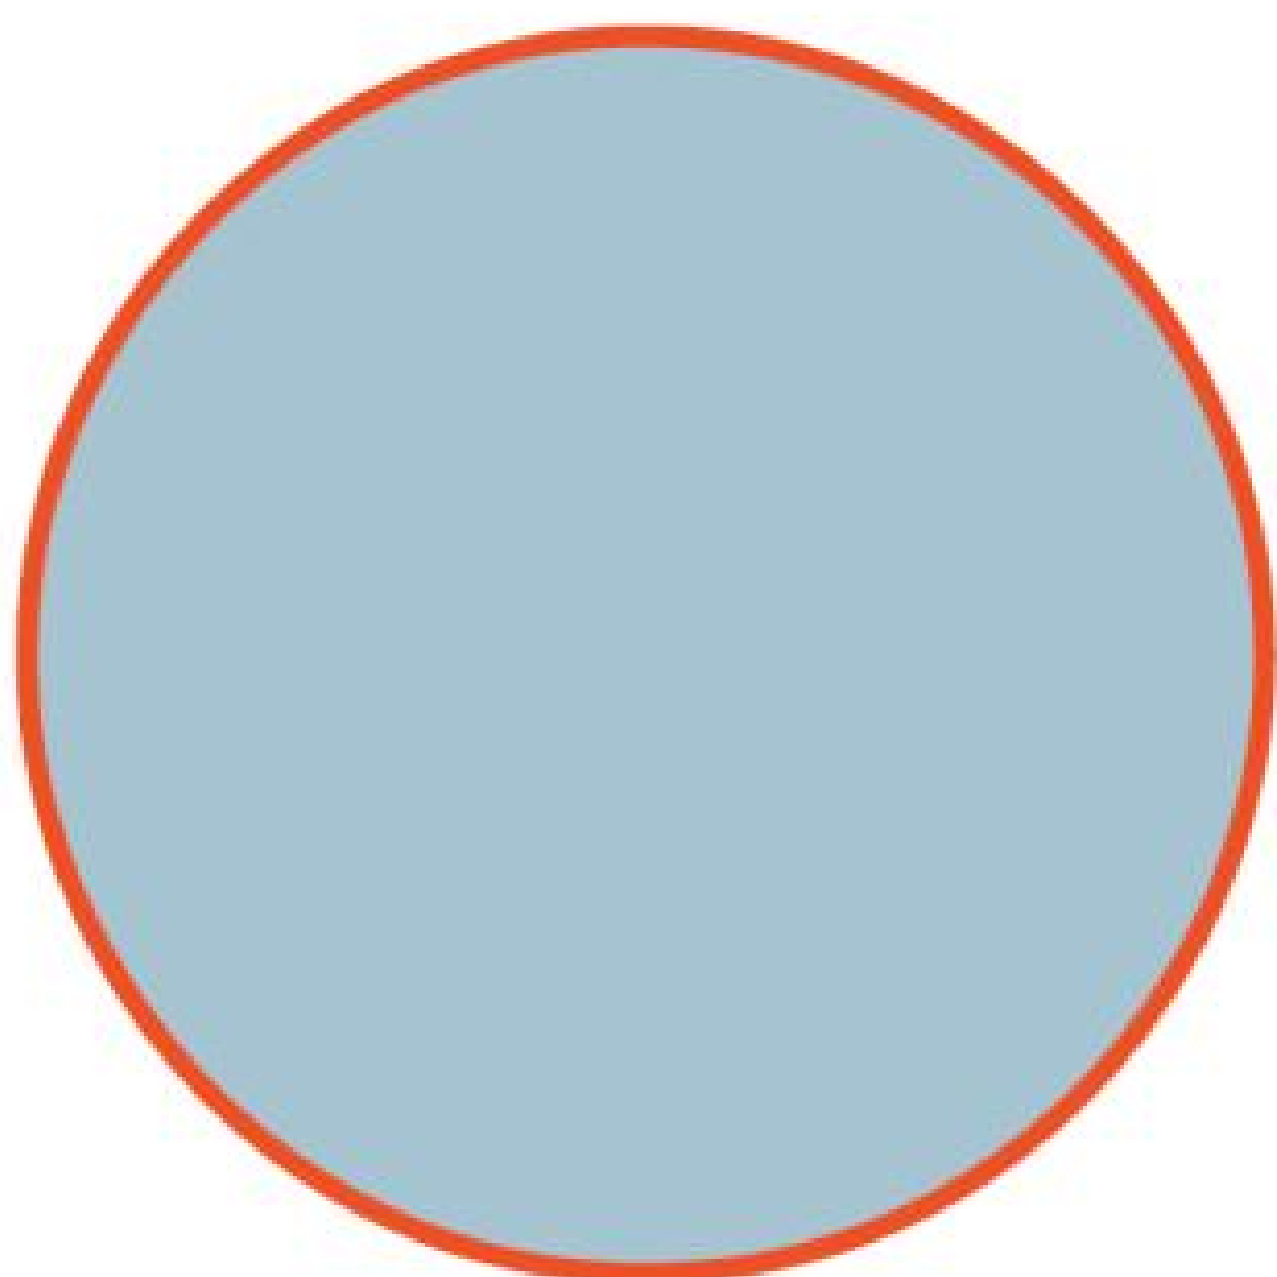

DECADENCE IN POURED RESIN

Creation ComfortFlor™ is the ultimate in luxury flooring. Poured polyurethane resin provides an implicit tactile softness that may be further accentuated when laid over an optional rubber crumb matting.

This seamless poured resin finish is available with zero VOC content and is an increasingly popular choice for high end retail establishments and luxury domestic installations. The system can be laid over most substrates including wood and can be applied in a wide variety of UV stable colours including white.

## EXAMPLE FINISHES

# ExternalFlor™

RESIN BONDED SOLUTION FOR OUTDOORS

A Creation ExternalFlor™ is a resin bonded aggregate system that creates a hard wearing, anti-slip but visually pleasing “natural look” surface. It is extremely durable and can be installed in a multitude of aggregates that may be blended to create a bespoke finish of infinite choice. Creation ExternalFlor™ is ideal for driveways, walkways and paths.

## EXAMPLE FINISHES

*extremely durable* ✓

*slip resistant* ✓

*natural aesthetics* ✓

*wide variety of finishes* ✓

*BS Floor Type 4-8* ✓

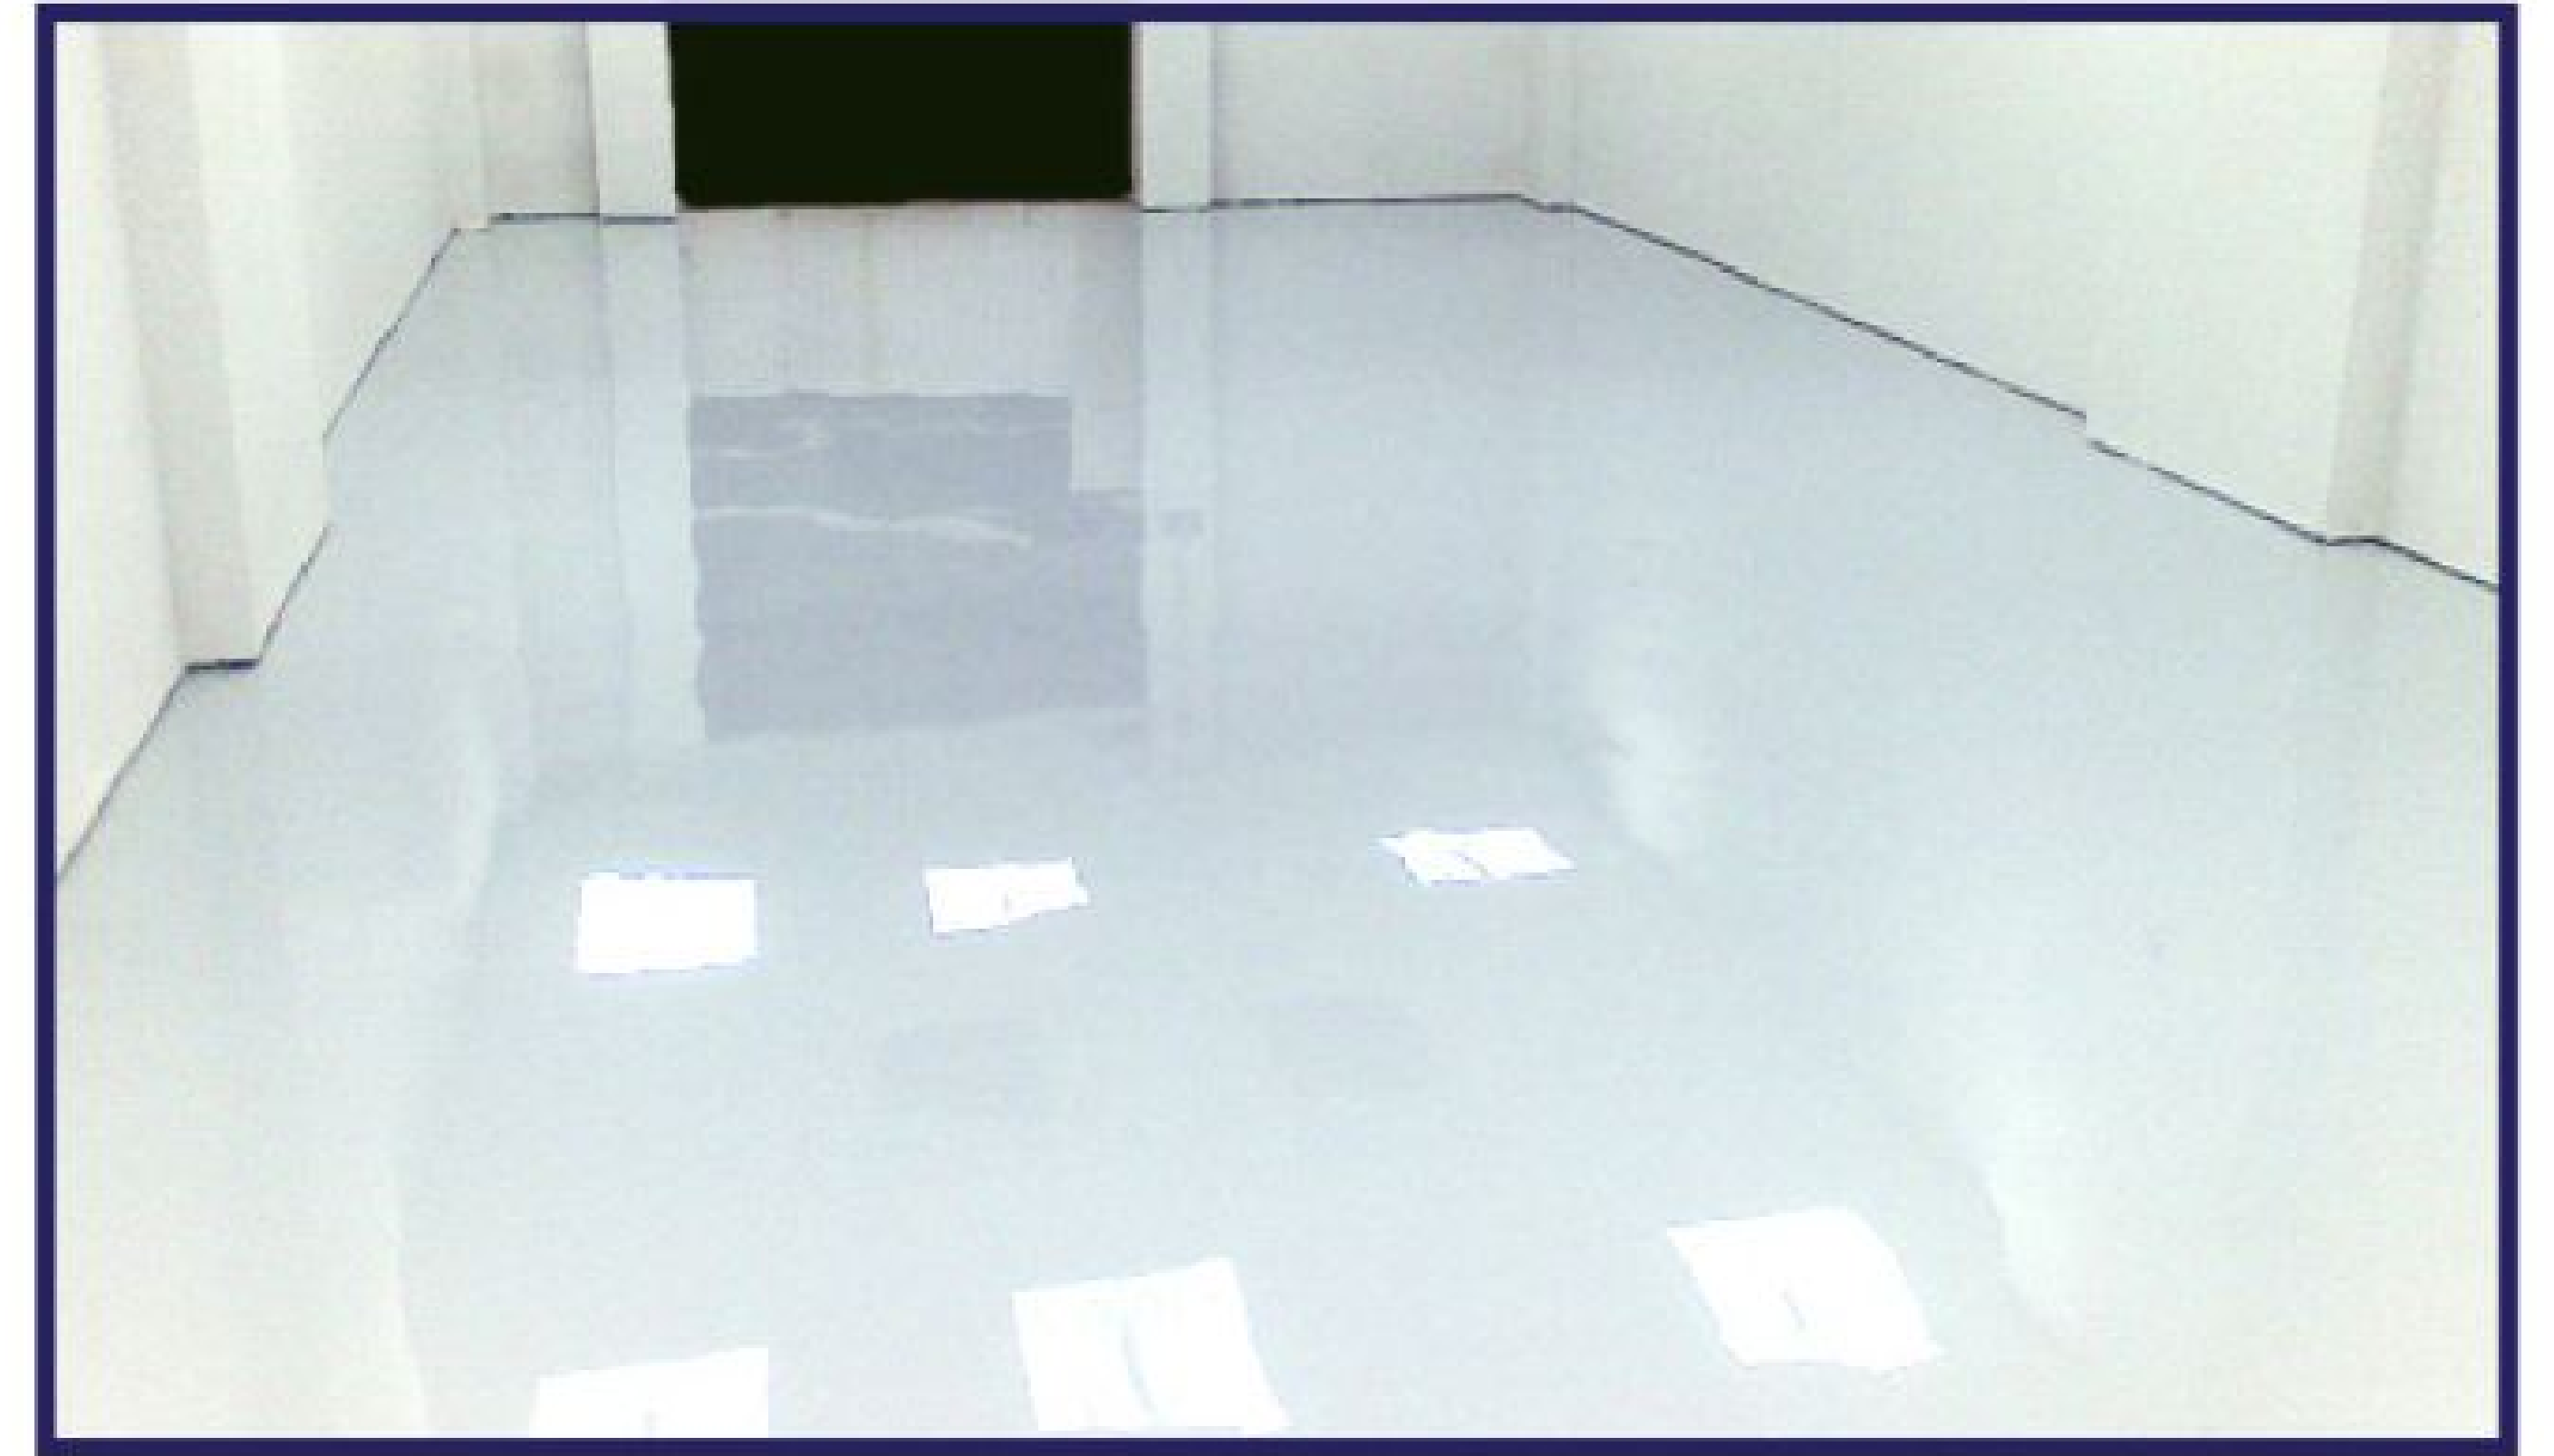

# AntistaticFlor™

DISSIPATIVE FLOORING

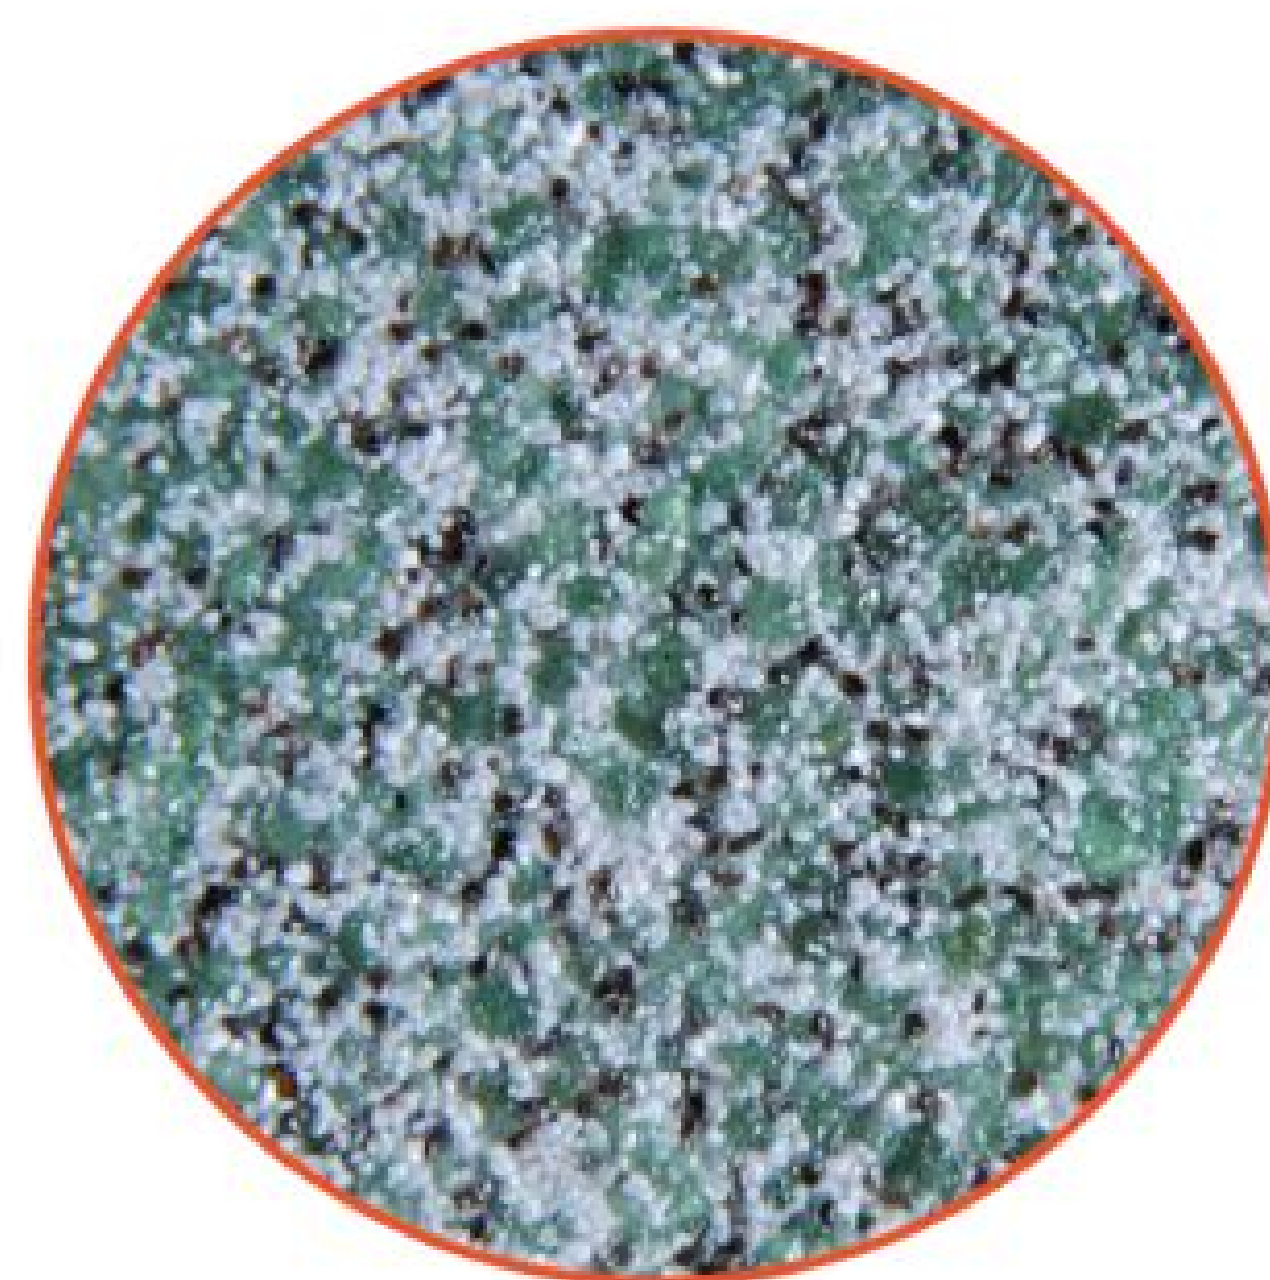

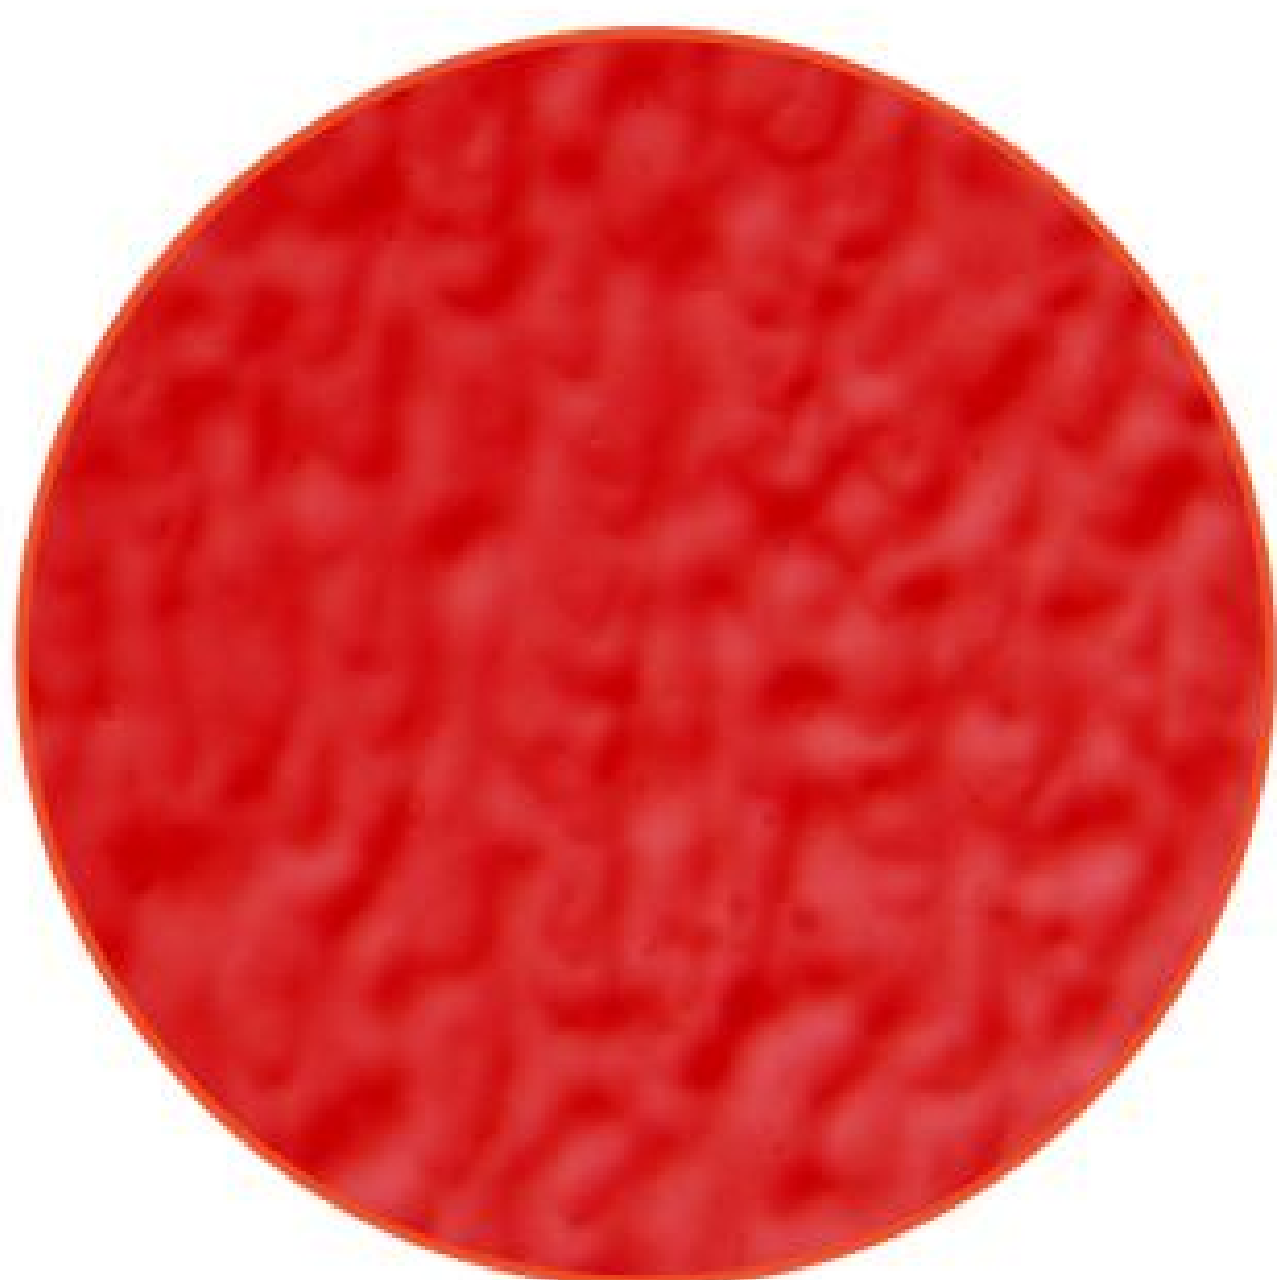

For areas where static charge can not be tolerated we are able to install a Creation AntistaticFlor™.

These multilayer systems use integral carbon filaments and copper wiring to dissipate charge through to a conductive layer that is earthed to ground.

A wide variety of finishes including high chemical and slip resistance are available. A Creation AntistaticFlor™ can be installed in any environment.

## EXAMPLE FINISHES

*anti-static* ✓

*extremely durable* ✓

*chemical resistant* ✓

*slip resistant* ✓

*improves ambient lighting* ✓

*BS Floor Type 3 - 8* ✓

**Creation AntistaticFlor™ at SMS Siemens - Nottingham**

# PumpFlor™

QUICK FLAT FLOOR

Creation PumpFlor™ provides a fast track industrial floor solution to renovate, repair and level old concrete floors. It is also possible to level and repair poorly formed or rain damaged slabs economically.

Applications are suitable for both indoor and outside areas with most systems fork truckable within 48 hrs. Where damp or “green” concrete is an issue this breathable yet durable solution negates the requirement for expensive epoxy primer treatments keeping your budget and programme on track.

*2,000m<sup>2</sup> installed a day* ✓

*fast track installation* ✓

*can be laid over wood* ✓

*cost effective floor renovation* ✓

*usable within 48 hours* ✓

**Creation PumpFlor™ at GE Aviation - Southampton**

Creation RapidProtect™ is a cutting edge coating, waterproofing and encapsulation system that creates a remarkable high performance membrane. Comprising of an elastomeric polyurea the resulting membrane cures almost instantly with excellent mechanical and chemical properties. The key to the rapid curing of the system lies in the specialist application methods that include the use of temperature and pressure regulating plural component spraying apparatus. This apparatus simultaneously sprays and combines two inactive compounds at specific heats and pressures to create the rapid curing membrane.

Common applications for Creation RapidProtect™ include: chemical bunds, waterproof and tanking, most roofs including asbestos, podium decks, parking decks, marine environments, internal tank protection, retention ponds, landfill containment, food processing plants and cold storage facilities. The potential applications are limitless.

*instant curing (15 seconds)* ✓

*seamless* ✓

*waterproof* ✓

*extremely durable* ✓

*flame resistant* ✓

*high chemical resistance* ✓

*high elasticity* ✓

*vertical and horizontal applications* ✓

*zero VOC (100% solid)* ✓

*application for 1mm to 50mm* ✓

*available in any BS or RAL colour* ✓

**Creation RapidProtect™ at GE Aviation Chemical Stores**

Concrete floors deserve better treatment than just being walked on. An HTC Superfloor™ will really make you appreciate the advantages of having concrete as an exposed floor surface. Dirty, grey floors are transformed into brilliant, easy-clean, environmentally-friendly and durable floor surfaces.

HTC's machines and diamond tools cut and polish concrete floors to remove the surface paste and expose the stronger concrete beneath. The result of this process is a stronger, more durable, shiny and beautiful floor. Coloured staining and increased stain resistance can also be offered. The environment and your bottom line both benefit too.

## EXAMPLE FINISHES

*Cost-effective*

*Aesthetically-appealing*

*Environmentally-friendly option*

*Just as good for new installations as for floor renovations*

*60% lower life cycle cost than with traditional flooring solutions*

*Within the range for international IEC 61340-5-1 for ESD values*

*Can be coloured without losing its qualities*

*Infinite lifespan with Twister™ maintenance*

*Highest fire-safety class*

*Easy-to-clean. No truck marks, etc.*

*Slip-proof, even when the floor is wet*

*Lower vibration level for vehicles*

**HTC Superfloor™ at Topps Tiles, Stevenage**

With the largest eco-friendly HTC grinding fleet in the UK we are able to prepare any size of floor and type of substrate quickly and economically. Using the latest multihead grinding technology we can prepare a surface to a superior finish with no “witness marks”, low noise level and little dust foregoing the need for any additional self-levelling compounds.

Our methods work with the existing floor and allow us to remove one or more old floor coverings but leave the substrate in perfect condition. Immediately after grinding, you can start a new floor covering or even continue the diamond cut and polish process to create a polished concrete Superfloor™.

### HTC Superprep™

- +** A flat surface can always be achieved
- +** No witness marks
- +** Minimum covering material required
- +** Close to edges
- +** Low noise level and little dust
- +** Many areas of use
- +** Functions on all surfaces

### Shotblasting

- Impossible to get a surface flat
- Leaves significant witness marks
- Extra covering material is required
- Leaves 70-90mm from walls
- Lots of dust, vibration and noise
- Few areas of use
- Cannot use on rubber/latex/wet surfaces

**HTC Superprep™ at Mitchell Way - Portsmouth**

# Why Choose Us?

---

Creation has a long track record of successful bespoke projects so our experience and expertise are unparalleled.

We also insist on using the best products, the best tools and the best methods of application available. Our concern is quality as we know that getting it wrong or cutting corners never pays.

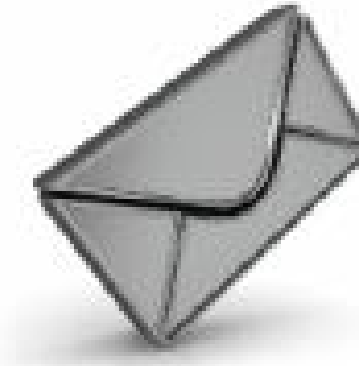

Creation is also the only concrete and resin flooring specialist in the UK run as a Limited Liability Partnership.

This means the Operatives working on your floor have a vested interest in the quality and success of your installation. Consequently, we believe we have the most motivated workforce in our industry in the UK.
