

AntistaticFlor™

DISSIPATIVE FLOORING

Creation AntistaticFlor™ at SMS Siemens, Nottingham

For areas where static charge can not be tolerated we are able to install a Creation AntistaticFlor™.

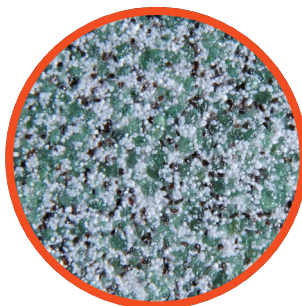

These multilayer systems use integral carbon filaments and copper wiring to dissipate charge through to a conductive layer that is earthed to ground.

A wide variety of finishes including high chemical and slip resistance are available. A Creation AntistaticFlor™ can be installed in any environment.

Creation AntistaticFlor™ at Network Rail, Leeds
